Important Information - Required Access and Airspace for Treatment of Containers and Cargo	
MPI periodically requires containers (and cargo) to be treated to kill pests, and recommends containers are packed with enough space (≥ 200 mm around the contents of the container) to allow for treatment. Note: If containers are too full and there is insufficient space for circulation and sensors for treatment, MPI may consider biosecurity risk is too great to allow unloading; and such containers are likely to be rejected and re-shipped out of New Zealand.	
I CERTIFY THAT THE ABOVE INFORMATION IS TRUE AND CORRECT
